

Setting up Application Environment

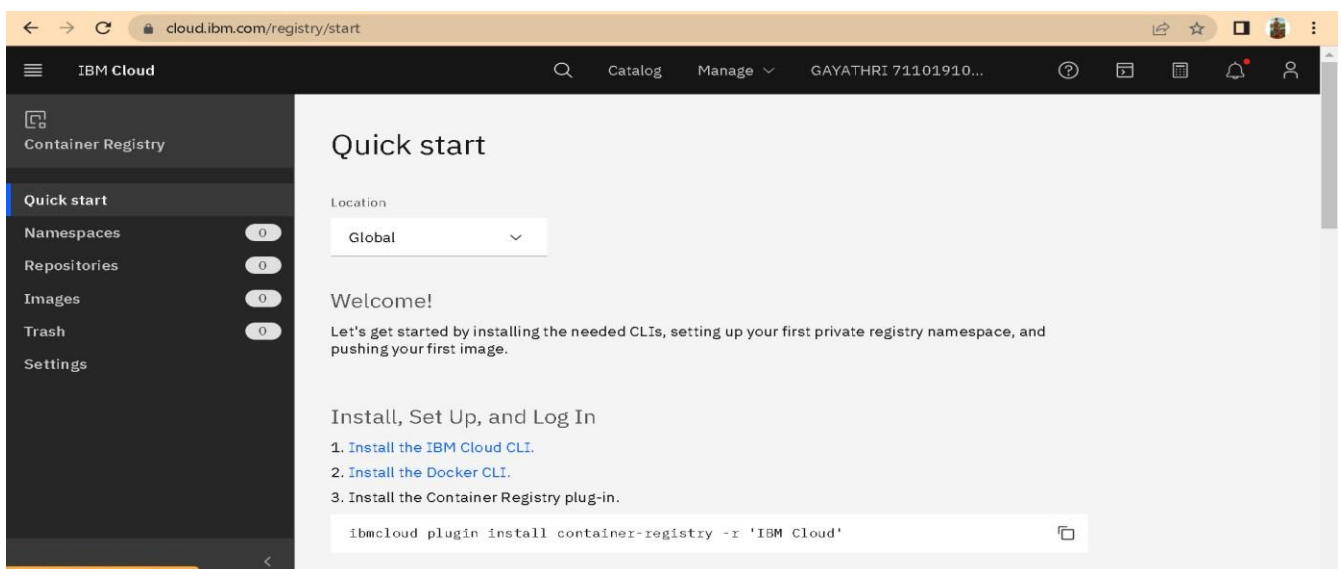

Install IBM Cloud CLI

Date	25 October 2022
Team ID	PNT2022TMID25936
Project Name	Skill/Job Recommender Application

Step 1. First login with cloud.ibm.com,—>Next search with Container Registry in ibm search catalog

Step 2 Next click Get started button → Next click Install the IBM Cloud CLI.

Step 3: In cloud CLI there is list of commands insert the into our windows command prompt

The screenshot shows a web browser window with the URL `cloud.ibm.com/docs/containers?topic=containers-cs_cli_install`. The page displays instructions for installing the IBM Cloud CLI and plugins. On the right side, there is a sidebar with a search bar, a user icon, and a 'Console' button. Below the search bar, there is a section titled 'On this page' with a list of links: 'Installing the IBM Cloud CLI and plugins', 'Installing the Kubernetes CLI (kubectl)', 'Running the CLI in a container on your computer', 'Configuring the CLI to run kubectl', and 'Setting the Kubernetes context for multiple clusters'. A 'Feedback' button is also visible.

Overlaid on the browser window is a Windows command prompt window. The title bar reads 'C:\WINDOWS\system32\cmd.exe'. The command prompt shows the following output:

```
C:\Users\BALAJI>ibmcloud plugin install container-service
Looking up 'container-service' from repository 'IBM Cloud'...
Plug-in 'container-service[kubernetes-service/ks] 1.0.459' found in repository 'IBM Cloud'
Attempting to download the binary file...
